Acknowledgements begin on this page

**1. A detailed explanation must be provided regarding the research background, the relationship between the advisor and the participating students, the role played by the advisor in the thesis writing process, whether the guidance was compensated, and any assistance from others in completing the research results. If necessary, resumes of the participating students and the advisor may be attached.**

**2. A detailed account of the entire research process must be provided, including the source of the research topic, data acquisition, data analysis and computation, experimental design and implementation, and the writing of the thesis. This should include a clear division of labor, specifying the specific roles and contributions of the advisor and each participating student in the research report. Any difficulties encountered at different stages and the processes used to overcome these challenges should also be described. This section should be 1–2 pages (500–1000 words) in a Word document.**
